Heidelberg pH Test Consent and Billing Disclosure

What is a Heidelberg pH Test?

- The physician will require a complete medical history before the test
- There will be a transceiver that is placed over the patient's stomach during the test.
- The pre test instructions will help achieve the most accurate results.
- There is no discomfort during a Heidelberg pH test. Patients are relaxed and comfortable.
- Remember to grab a good old fashioned distraction to pass the time.
- Due to wireless interference, cell phones and personal electronic devices may need to be powered off.
- The results are immediate so the physician may have the post test consultation the same day.
